

FELIX YAP SOON WEI

Computer Science Graduate
Specializing in Artificial Intelligence

FelixYSW

Felix Soon Wei Yap

felixysw.tech@gmail.com

Kuala Lumpur, Malaysia

EDUCATION

Foundation in Information Technology
Multimedia University Cyberjaya
Oct 2022 - Sept 2023 | CGPA 3.0

Bachelor of Computer Science (Hons) (Artificial Intelligence)
Asia Pacific University Bukit Jalil
Nov 2023 - Oct 2026 | CGPA 3.5

LANGUAGES

English
Chinese
Bahasa Malaysia
Cantonese

TECHNICAL SKILLS

AI & Machine Learning

Machine Learning • Computer Vision • Model Training • Data Analysis • RapidMiner

Mobile & Web Development

iOS (Swift) • React Native • ARKit • Core ML • React • Next.js • JavaScript • TypeScript • Tailwind CSS • Firebase

Programming

Python • Java • C# • C++ • SQL • R

Tools & Design

Git • Docker • Figma • Google Colab

RELEVANT JOB EXPERIENCES

R&D Intern

at REDtone Telecommunications Sdn Bhd
Sept 2025 - Jan 2026 (16-week Internship)

- Built AI agent solutions for clients using modern software architecture.
- Redesigned the frontend interfaces of the company's AI services portal.

KEY PROJECTS

Accessible Navigation with CV and AR

Final Year Project
React Native • Swift • ARKit • Core ML • YOLO26

- Built an iOS app for wheelchair, walker and cane users that plans barrier-aware routes from OpenStreetMap data.
- Implemented AR route guidance (ARKit, ARCore Geospatial) and on-device YOLO26n hazard detection at 10 Hz.

Event Ticketing Web App

Personal Side Project
React (Vite) • Tailwind CSS • Firebase • API (Billplz, Google)

- Built a responsive ticketing platform with guest checkout, QR-code tickets and admin-approved organizer onboarding.
- Architected a serverless Firebase backend (Firestore, Auth, Functions): role-based rules with automated tests, Billplz payments, transactional email and GitHub Actions CI/CD.

Pet Breeder Genealogy Tracker

Personal Side Project
JavaScript • HTML • CSS • Firebase

- Built a Progressive Web App (PWA) to visually track and manage complex hierarchical breeder lineage data.
- Implemented a real-time data sync pipeline via Firebase, protected by strict device authorization security.

Malaysia Photovoltaic Energy Output Predictor

Academic Group Project
React • TypeScript • Google API • Self-Trained XGBoost

- Engineered an in-browser XGBoost inference engine within a React GIS app, predicting solar yields from 8,760 hours of live weather data without a backend.
- Developed a custom HTML5 Canvas renderer with viewport culling for lag-free, dynamic visualization of extensive power grids and AHP-scored heatmaps.
